GALVASHIELD® XPT

Exact same performance as the original Galvashield® XP but with the following features and benefits:

ANODE SHAPE

- Thin, elongated shape fits easily along bar
- Does not require any additional concrete removal to make space for anode
- Works well in low cover situations

ANODE CONNECTION

- One-and-Done™ single wire connection
- Can be installed up to 2x faster than original two-wire connection method
- Reduced labor cost
- More efficient project schedule

[Watch One-and-Done™ Anode Installation](#)

PACKAGING

- Innovative disposable trays
- 50 anodes per box
- Less shipping cost

We Save Structures™
